

# Maximize the return on your SmartView® Inspection System with online Advanced Winder Advisor (AWA) training

## WHAT IS IT?

Remote instructor-led training for SmartView Inspection Systems is conducted online by highly skilled professionals, experienced in both the product and customer applications.

It is delivered remotely and can be attended from home or the office. Our focused online training is broken down into sections for specific job functions or system components.

In addition to the “virtual classroom”, we have developed a series of self-learning labs that use a “live” training system to reinforce the material and focus on specific customer tasks.

Online training systems are used to practice the knowledge gained with hands-on experience.

## WHAT PRIOR KNOWLEDGE IS NEEDED?

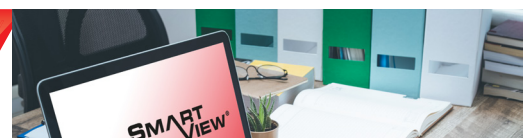

We strongly advise that the SmartView Fundamentals training is undertaken before the Advanced Winder Advisor training. For new SmartView users this is a requirement.

This class is also suitable as a refresher for those who have already undertaken the SmartView Administrator classroom training or are involved with the Advanced Winder Advisor, understand the basics already and want to now enhance their knowledge.

## WHO SHOULD ATTEND?

Anyone who is actively involved in operating and maintaining an Advanced Winder Advisor system on a rewind line. This training will enable the user to optimize, maintain and troubleshoot this system and run the winder at its maximum capacity.

**REGISTER FOR A TRAINING CLASS**  
[www.ameteksurfacevision.com/training](http://www.ameteksurfacevision.com/training)

### TRAINING TOPICS

- Configuring the ink marker
- Marking locations on process line
- Understanding synchronization marks
- Tracking the web edge
- Positioning of material on rewinder
- Setting up winder control setup
- Optimizing full, slow and crawl speeds
- Detecting synchronization marks
- Verifying synchronization marks
- Loading inspection file
- Selecting defects
- Troubleshooting
- Optimizing capacity

At the end of this training the trainee will be evaluated and certification provided.

### DURATION OF TRAINING

The Advanced Winder Advisor training is a two-day course comprising four hours of online training each day.

### TRAINING REQUIREMENTS

- A PC with connection to the internet and Microsoft Teams application
- A quiet room or office location is suggested
- Comfortable headset, large screen and webcam for class interaction

### OTHER TRAINING

Current remote training courses available:

- SmartView Fundamentals (SV-TR-FUN)
- SmartView Advanced (SV-TR-ADV)
- SmartView Maintenance and Troubleshooting (SV-TR-MT)

### COURSE BENEFITS

- > **OPTIMIZE THE QUALITY OF YOUR PRODUCT**  
Gain a clear understanding of Advanced Winder Advisor tools enabling an optimized use of the rewinder capacity.
- > **INCREASE PRODUCTION**  
Reduce downtime
- > **MAXIMIZE RETURN ON INVESTMENT**
